ShApes Geometry Algebra

## Available PhD positions and Postdoc positions at JKU Linz, Institute of Applied Geometry, in the Marie Curie Network SAGA

<http://www.saga-network.eu>, <http://www.ag.jku.at>

Are you interested in obtaining a PhD about the industrial use of mathematics, and study for the PhD in a country different from where you live now? Or do you want to perform postdoctoral research? If this is the case, you should consider applying for a PhD-fellowship or a Postdoc position in the SAGA project at JKU Linz.

SAGA is an EU-financed Marie Curie Initial Training Network consisting of a total of 10 partners coming from Austria, France, Greece, Italy, Lithuania, Norway and Spain. The SAGA participants are universities, research institutes and industrial companies. The main objective of the network is to train PhD-fellows within selected research topics well suited for a later career in industry and academia.

SAGA started November 1, 2008 and will end October 31, 2012. The implication is that all PhD-fellowships in SAGA of duration 36 months have to be filled before November 1, 2009.

To be eligible for a SAGA PhD-position you must have less than 4 years of research experience after your master degree. Consequently, you will be eligible for a 36-month SAGA fellowship if you obtain a master degree (within mathematics, numerical analysis or related fields) before the end of October 2009. To be eligible for a SAGA postdoc position you should have a PhD degree and you must have less than 5 years of research experience after your master degree.

As we have a strict deadline, do not wait to apply, positions will be filled when good candidates are found. Note that you are not eligible for a position in the country where you have lived the last couple of years. SAGA has the ambition of filling at least 40% of its positions with female candidates. Therefore we especially urge women to apply.

The salary and other compensations in the Marie Curie program vary between countries according to specific Marie Curie rules. In many countries, including Austria, Marie Curie PhD-fellowship salaries are higher than the standard national PhD-rates. The employment contracts for PhD-fellows in Marie Curie Initial Training Networks provide full social benefits, and the fellow pays taxes as any other employee in the recruiting organization.

For information about the position at JKU Linz, please contact Bert Jüttler,
