

Senior Research Position in Industrial Mathematics

The Centre de Recerca Matemàtica (CRM) invites applications for a senior research position in Industrial Mathematics. The appointment will be for an initial period of five years. This position is part of a strategic plan of the CRM to develop links between academia and industry by hosting research and advanced teaching initiatives at the highest scientific level.

The position holder should establish and lead an independent research programme in a multidisciplinary environment, open to engaging with researchers in related fields in the Barcelona area, and with practitioners in industries. Teaching in advanced courses can also be required. Start-up resources and funding for mobility will be available too.

Applications should be submitted before March 15, 2009 to J. Bruna, Director of the CRM (JBruna@crm.cat) and to the crm@crm.cat . The starting date is subject to negotiation, as well as the salary level, that will commensurate with the candidate's experience. Applications should include a curriculum vitae, a publication list, and a concise statement of research interests for the future. Given the specific intent of establishing links with industry, applicants should have a provable track record in Industrial Mathematics, with experience in team leading and team building and with links to existing research groups in this field, at an international level. Names and e-mail addresses of at least three references to be contacted by the CRM must be included.

Bellaterra (Barcelona, Spain), January 15, 2009
